

KARANJOT SINGH

SOFTWARE ENGINEER

Dallas, TX | 9459985647 | karanjot.s1195@gmail.com | [linkedin.com/in/karanjotsingh1995](https://www.linkedin.com/in/karanjotsingh1995) | karanjot1995.github.io | github.com/Karanjot1995

WORK EXPERIENCE

Goldman Sachs (Dallas, Tx): Software Engineer

Dec 2024 – Current

- Designed and implemented an auto log-off feature for Project Axon, enhancing security and enabling efficient people search functionality filtered by specific cities and organizations
- Engineered an internal dashboard for Voice Data Analytics leveraging Snowflake, MySQL, and Java improving data processing efficiency by 35%
- Designed and implemented pipelines to ingest voice data from multiple devices into a data warehouse for the analytics dashboard, increasing data accessibility for stakeholders by 50%, enabling faster and more informed decision-making.

Megger (Dallas, Tx): Software Engineer

Jul 2023 – Dec 2024

- Developed and deployed the Megger online interface (demoassets.com) on AWS, integrating advanced tracking features, microservice architecture and distributed systems improving delivery accuracy for over 10000 customers monthly.
- Spearheaded all processes from design, development to testing, leveraging multithreading, networking, and performance tuning for optimal performance.
- Fabricated the rental platform utilizing React, HTML, CSS and built RESTful APIs using Java Spring Boot, PHP, ECS, EC2, S3, Elastic beanstalk to serve data stored in MySQL, reducing costs by 75% and enhancing scalability.

Megger (Dallas, Tx): Software Engineer Intern

Jun 2022 - May 2023

- Rollout a fully functional Megger online interface for equipment administration and tracking using Java, Spring Boot, JavaScript, Vue.js, and MySQL, Node.js, incorporating distributed systems and reducing manual entry time by 50%.
- Validated, tested, and wrote code following the Software Development Life Cycle (SDLC) to enhance performance, improve user experience, and save operational costs by 60% while reducing time by 25%.

Collegedunia Web Pvt. Ltd.: Software Engineer

Mar 2021 - Aug 2021

- Spearheaded the integration and development of collegedunia.com, leveraging microservice architecture and a disciplined approach to code review, testing, and documentation, increasing user engagement by over 1,000 unique visits per month.
- Led a team of 10 engineers in refactoring and redesigning applications, reducing the software development cycle by 15% through automation testing and optimized deployment pipelines.
- Enhanced code coverage by 25% with Cypress and implemented scalable systems using React, Node.js, and Next.js, ECS, EC2, S3, improving performance and reliability.

Hogarth Worldwide, India: Software Engineer

Jul 2018 - Mar 2021

- Orchestrated the development of discernliving.com, a scalable web application with millions of users using Java, Kafka, AJAX, Node.js, React, Cassandra and React Native for mobile development and deployed on Azure, generating over \$1 million in revenue in its first year.
- Led the development of the BMW India website on the AEM Platform (Java) and Spring MVC, enhancing user engagement by 25% through performance tuning, responsive design, and multithreading.
- Developed a Workplace Management Tool using React, REST/SOAP API, Node.js, Python and CI/CD, reducing manual intervention by 60% and incorporating cloud technologies for high availability and fault tolerance and Integrated Kafka Queues and Elasticsearch into various applications to handle large-scale data, optimizing the system's performance and scalability.

CERTIFICATIONS

Coursera Meta Front-End: [React](#), [JavaScript](#), [Version Control](#), [HTML & CSS in Depth](#)

EDUCATION

The University of Texas at Arlington: **M.S. Computer Science**

Aug 2021 - May 2023

Guru Gobind Singh Indraprastha University, Delhi: **B.S in Electronics and Communication Engineering**

Aug 2013 - May 2017

SKILLS

Technical Skills: Debugging, quality control, service integration, full stack web application development, object-oriented design, design patterns, system design, microservices, SDLC, multithreading, performance tuning, DevOps, test-driven development, data science, Machine Learning, android development

Programming Languages: JavaScript (expert), Typescript, Python, Java, PHP, Ruby, Golang, C#, C++, SQL, GraphQL, HTML, CSS, .Net

Frameworks & Libraries: Frontend: ReactJS, Redux, Vue, AngularJS, Next.js, Nest.js, jQuery, D3, Backend/Mobile: Node.js, Express.js, Django, Spring Boot, Ruby on Rails, Scala, Laravel, React Native, Flask, XML, SQL Server Reporting Services (SSRS), SQL Server Integration Services (SSIS), ADO, XML, PowerBI, Fox Pro, Couchbase, JSON, Rest API, Less, Sass, NPM, Yarn, WCAG, JSP, JMS, JAXB, JDBC, EJB

Tools, Database and OS: Git, Platform Services, Azure, AWS, Google Cloud, GCP, Docker, Kubernetes, Apache Kafka, Jenkins, Jira, Oracle DB, MySQL, NoSQL, Cassandra, MongoDB, PostgreSQL, Hadoop, Elastic search, Spark, Linux, ECS, EC2, S3, Postman, ELK, JUnit, REST/SOAP, Jest, Cypress, Maven, Webpack, GitHub Actions, Rally/ADO, Hibernate, Solr, Bash, OpenStack, Lambda, Mockito, Selenium, Agile, SAP, Splunk, WebPack, Grunt, Gulp

PROJECTS

DSA Prep : Launched an app to streamline the prep process for data structures and algorithms, supporting coding interview readiness for over 100 clients

Groomers.in : Engineered an e-commerce platform to empower local Indian businesses during COVID-19, attracting over 200 users.
