

KARANJOT SINGH

SOFTWARE ENGINEER

• Arlington, TX • 682-313-4726 • karan.nanda97@gmail.com • [linkedin.com/in/karanjotsingh1995](https://www.linkedin.com/in/karanjotsingh1995) • karanjot1995.github.io • github.com/Karanjot1995

Full stack software engineer with 4+ years of expertise in JavaScript, PHP, Java, Python, SQL, and other languages. Proficient in design, development and integration, with a solid grasp of data structures and algorithms, and 10+ full stack application deployments over the years.

WORK EXPERIENCE

Megger (Dallas, Tx): Software Engineer

Jul 2023 – Current

- Functioned and constructed the Megger online interface (demoassets.com) for equipment delivery, administration, and tracking, using PHP Laravel, Vuejs, JavaScript, and MySQL, and deployed it on AWS.
- Singlehandedly took care of all the processes from design and development to testing.
- Fabricated the rental platform utilizing technologies such as Vuejs and built RESTful APIs using PHP Laravel to serve the data stored in MYSQL db. Thus, cutting the cost for paid platforms by almost **75%**.

Megger (Dallas, Tx): Software Engineer Intern

Jun 2022 - May 2023

- Solely developed, designed and tested Megger web portal(demoassets.com) for handling equipment delivery and management using PHP Laravel, Vuejs, JavaScript and MySQL.
- Validated, tested and wrote code to maximize the performance following the Software Development Life Cycle (SDLC) enhancing user experience and saving operational costs by **50%** and time by **25%**.

Collegedunia Web Pvt. Ltd.: Software Engineer

Mar 2021 - Aug 2021

- Spearheaded the integration and development of **collegedunia.com** from March 2021 to August 2021 as a senior software engineer on their main education portal(collegedunia.com) and led a team of 10 using Nextjs, React, Nodejs, HTML and CSS.
- Defined and conducted the project on various stages including research, conceptualization, testing and implementation and fashioned various components like forms, search etc. and crafting 20+ APIs.
- Achieved a 15% reduction in software development cycle time by optimizing the deployment pipeline and implementing automated testing.

Hogarth Worldwide, India: Software Engineer

Jul 2018 - Mar 2021

- Oversaw the development and launch of the discernliving.com web application leading a team of 4 and assisted them in generating over \$1 million in revenue in only the first year of business using React, Nodejs, Expressjs, Cassandra, MongoDB and Flutter for mobile app development.
- Achieved a 20% improvement in website loading speed by optimizing frontend code and implementing caching strategies.
- Authored and Maintained BMW India website as a team lead on AEM Platform (Java), Spring-Boot and Angular, and increased user engagement by **25%** through the implementation of responsive design and interactive user interface.
- Orchestrated the development of a cutting-edge **Workplace Management Tool** for HR and employee management resulting reduction in manual intervention and cut down employee management time by a significant **60%**.
- Automated the SEO process by creating an **SEO Tool** leveraging technologies like React, JavaScript, Redux and Nodejs.
- Other Technologies/skills used: Docker, Kubernetes, Git, Azure, Cloudflare, NPM, Laravel, PostgreSQL, Elasticsearch, Postgres, Redis, DynamoDB, Kafka, MongoDB, GitHub CI/CD with a Continuous Delivery Model, Typescript, GraphQL APIs, OOA, OOD, and OOP principles & design patterns

CERTIFICATIONS

Coursera Meta Front-End: [React](#), [JavaScript](#), [Version Control](#), [HTML & CSS in Depth](#)

EDUCATION

The University of Texas at Arlington: **M.S. Computer Science**

Aug 2021 - May 2023

Guru Gobind Singh Indraprastha University, Delhi: **B.S in Electronics and Communication Engineering**

Aug 2013 - May 2017

SKILLS

Technical Skills: Identifying and debugging issues, deploying effective quality control procedures, integrating services and components, developing web applications, using software development methods, proficiency in object-oriented design techniques, Sockets, TCP/IP, UDP, TDD, Microservices.

Programming Languages: JavaScript (expert), Typescript, Python, Java, PHP, Ruby, GoLang, C#, C++, SQL, GraphQL, HTML, CSS, .Net

Frameworks & Libraries: React, NestJs, Next.js, Vue, Angular, Redux, jQuery, D3, Node.js, Express.js, Django, React Native, Laravel, Flask, Scala, Spring Boot, Ruby on Rails, Rest API, Junit

Tools, Databases, and OS: Git, AWS, Lambda, S3, DynamoDB, Firebase, Azure, GCP, CI/CD, Kafka, RabbitMQ, Docker, OracleDB, MySQL, MongoDB, PostgreSQL, Unix, Shell, Jest, Cypress, Spark, Kubernetes, Jenkins, React Testing Library, Jira, Postman.

PROJECTS

DSA Prep : Launched an app to streamline the preparation of data structures and algorithms for coding interviews used by 100+ clients (Reactjs, Mongodb, Node.js)

Groomers.in : An e-commerce shopping platform to support local Indian businesses during Covid with over 200+ users (React.js, MySQL, Expressjs)

Other Projects: Digital Image Processing image processing and manipulation app in C++, Book Management System, **groomers.in**, **socialweb.co.in**, SEO Tool, authentication (HTML, CSS, JavaScript, React, Nodejs, Python, MySQL, MongoDB).
