WORK EXPERIENCE

Megger (Dallas, Tx): Software Engineer

Jul 2023 – Current

- Developed and deployed the Megger online interface (demoassets.com) on AWS, integrating advanced tracking features that improved delivery accuracy; tool is now utilized by over **300** customers monthly.
- Singlehandedly took care of all the processes from design and development to testing.
- Fabricated the rental platform utilizing technologies such as Vue.js and built RESTful APIs using PHP Laravel to serve the data stored in MYSQL db. Thus, cutting the cost for paid platforms by almost **75%**.

Megger (Dallas, Tx): Software Engineer Intern

Jun 2022 - May 2023

- Rollled out a fully functional Megger online interface for equipment administration and tracking using PHP Laravel, Vue.js, and MySQL; system reduced manual entry time by **50%**, boosting team productivity and accuracy.
- Validated, tested and wrote code to maximize the performance following the Software Development Life Cycle (SDLC) enhancing user experience and saving operational costs by **60%** and time by **25%**.

Collegedunia Web Pvt. Ltd.: Software Engineer

Mar 2021 - Aug 2021

- Spearheaded the integration and development as a senior software engineer on **collegedunia.com** and led a team of 10 directly contributing to an increase in user engagement with over **1000** unique visits per month, enhancing the platform's visibility and usage.
- Defined and conducted the project on various stages including research, conceptualization, testing and implementation and fashioned various components like forms, search etc. and crafting **20+** APIs and microservices architecture to enhance scalability.
- Achieved a **15%** reduction in software development cycle time by optimizing the deployment pipeline and implementing automation testing.
- Enhanced code coverage by **25%** through the implementation of software testing with Cypress. Tech stack: Next.js, React, Nodejs, XML, HTML, CSS.

Hogarth Worldwide, India: Software Engineer

Jul 2018 - Mar 2021

- Oversaw the development and launch of the discernliving.com web application leading a team of 4 and assisted them in generating over **\$1 million** in revenue in only the first year of business using React, Nodejs, AJAX, Express.js and Cassandra and MongoDB and Flutter for mobile app development.
- Authored and Maintained BMW India website as a team lead on AEM Platform (**Java**), Spring MVC, **Spring Boot** and Angular, and increased user engagement by **25%** through the implementation of responsive design and interactive user interface.
- Orchestrated the development of a cutting-edge **Workplace Management Tool** for employee management resulting reduction in manual intervention and cut down employee management time by a significant **60%** using React, REST/SOAP API, **Python(Django)** and CI/CD.
- Implemented an SEO automation tool using Flutter, React, JavaScript, Redux, and Node.js, resulting in a 20% improvement in website loading speed through frontend code optimization and advanced caching techniques.

CERTIFICATIONS

Coursera Meta Front-End: [React](#), [JavaScript](#), [Version Control](#), [HTML & CSS in Depth](#)

EDUCATION

The University of Texas at Arlington: **M.S. Computer Science**

Aug 2021 - May 2023

Guru Gobind Singh Indraprastha University, Delhi: **B.S in Electronics and Communication Engineering**

Aug 2013 - May 2017

SKILLS

Technical Skills: Debugging, quality control, service integration, web application development, object-oriented design, design patterns, system design, microservices.

Programming Languages: JavaScript (expert), Typescript, Python, Java, PHP, Ruby, Golang, C#, C++, SQL, GraphQL, HTML, CSS, .Net

Frameworks & Libraries: Frontend: React, Redux, Vue, Angular, Next.js, Nest.js, jQuery, D3, Backend/Mobile: Node.js, Express.js, Django, Spring Boot, Ruby on Rails, Scala, Laravel, React Native, Flask

Tools, Databases: Git, AWS, GCP, Docker, Kubernetes, Kafka, Jenkins, Jira, Oracle DB, MySQL, Cassandra, MongoDB, PostgreSQL, Elasticsearch, Unix, Postman, ELK, Spark, JUnit, REST/SOAP, Jest, Cypress, Maven, Webpack, GitHub Actions, Rally/ADO

PROJECTS

DSA Prep : Launched an app to streamline the preparation process for data structures and algorithms, supporting coding interview readiness for over 100 clients using React.js, MongoDB, Node.js.

Groomers.in : Engineered an e-commerce platform to empower local Indian businesses during COVID-19, attracting over 200 users. (Stack: React.js, MySQL, Express.js)

Other Projects:

Digital Image Processing: Implemented an image processing and manipulation app in C++.

Book Management System: Built a comprehensive system for managing book inventories.

Socialweb.co.in: Created a social networking platform.
